Dialer Operations Manager

PYTHON LEADS

01 YEARS (2020-2021)

1. **Dialer Strategy Management**: Develop and implement effective dialer strategies to optimize call center efficiency and maximize agent productivity.
2. **System Monitoring and Maintenance**: Oversee the daily operations of dialer systems, ensuring they run smoothly with minimal downtime or technical issues.
3. **Data Analysis**: Analyze campaign performance metrics and provide actionable insights to improve contact rates and overall operational efficiency.
4. **Compliance Oversight**: Ensure all dialer operations comply with industry regulations, including TCPA, GDPR, and other relevant standards.
5. **Team Coordination**: Collaborate with IT, Workforce Management, and Operations teams to align dialer settings with business goals and resource availability.
6. **Reporting and Optimization**: Generate detailed reports on dialer performance and lead efforts to continuously refine processes for better outcomes.

JOB DESCRIPTION

A Dialer Administrator is responsible for managing and maintaining automated dialing systems to optimize call center operations while ensuring compliance with regulations and company policies. They configure, update, and troubleshoot dialer software and hardware, generate performance reports to improve efficiency, and collaborate with IT and operations teams to implement solutions and upgrades. Additionally, they provide training and support to users, ensure data security and integrity, and promptly resolve system-related issues to minimize downtime. Meanwhile, an IT Consultant assesses client needs to provide tailored IT solutions, plans and manages technology upgrades, and offers guidance to improve IT infrastructure efficiency. They conduct system audits, recommend innovative solutions based on technological trends, and document project progress to ensure timely deliverables. The role also involves training clients and teams, offering technical support, and facilitating communication between stake holders and technical teams to ensure seamless implementation and operations.

CO- Director of Dialer Operations

TOUCHSTONE COMMUNICATIONS.

02 YEAR (2021-2023)

1. **Strategic Leadership**: Collaborate with the Director of Dialer Operations to develop and implement strategies for the effective use of dialer systems, ensuring alignment with organizational goals.

2. **Dialer System Management**: Oversee and optimize the performance of the dialer systems, ensuring they are running efficiently, minimizing downtime, and meeting key performance indicators (KPIs).

3. **Team Supervision**: Lead a team of dialer operations staff, including dialer analysts and technicians, providing guidance and support for daily operations and troubleshooting.

4. **Data Analysis & Reporting**: Analyze call center data and dialer performance metrics, providing actionable insights and recommendations to improve system efficiency and customer outcomes.

5. **Technology Integration**: Ensure that dialer systems are integrated with other call center technologies, such as CRM software, workforce management tools, and analytics platforms, for seamless operations.

6. **Compliance & Regulations**: Ensure that all dialer operations comply with industry regulations, including telemarketing laws, data privacy standards, and call center compliance requirements.

7. **Process Optimization**: Continuously evaluate and optimize dialer processes to improve productivity, call outcomes, and resource utilization, while minimizing customer wait times and dropped calls.

8. **Budget & Resource Management**: Manage the budget for dialer operations, including resource allocation for system upgrades, maintenance, and training, ensuring cost-effectiveness and operational efficiency.

ASPIRE LEADS

IT & DAILER MANAGER

01 YEAR (2023-2024)

1. **Vici Dialer System Administration**: Manage the daily operations of the Vici Dialer system, ensuring optimal configuration and performance for efficient call campaigns, including inbound and outbound calls.

2. **Campaign Management**: Design, configure, and manage dialer campaigns within the Vici system, setting up call lists, call routing, agent scripts, and ensuring they align with business objectives and performance goals.

3. **Performance Optimization**: Monitor dialer performance metrics such as call connection rates, drop rates, and agent efficiency, making adjustments as needed to improve outcomes and meet KPIs.

4. **Technical Troubleshooting & Support**: Act as the primary point of contact for troubleshooting dialer-related issues, including system errors, call routing issues, and campaign configurations, ensuring quick resolution to minimize downtime.
